

Vantage® Research Ultrasound System

Application Note - Vantage Example Scripts for NDE/NDT Applications
D00049 Rev. A

Summary

This document provides a matrix summary of all available example scripts in the directory: Examples_NDE_NDT. In addition, a brief description of each example type is provided, and associated with the first two columns of the matrix ("File Name" and "Description of Example"). These notes are extracted from the documentation in the header in the example script source code.

Table Of Contents

SUMMARY 1

1. IMAGING MODE PROGRAMMING EXAMPLE SCRIPTS 2

 1.1 FLASHANGLES - PLANE WAVES WITH MULTIPLE ANGLES..... 2

 1.2 FMC - FULL MATRIX CAPTURE..... 2

 1.3 LINEMODE - CONVENTIONAL SCANLINES WITH FOCUSED BEAMS 2

 1.4 WIDEBEAM - WEAKLY FOCUSED OVERLAPPING BEAMS..... 2

List of Tables

TABLE 1: VERASONICS EXAMPLE SCRIPTS NDE_NDT 2

1. Imaging Mode Programming Example Scripts

1.1 FlashAngles - Plane Waves with Multiple Angles

Sequence programming file using plane wave compounding. For each acquisition, all channels are active for transmit and receive.

1.2 FMC - Full Matrix Capture

Sequence programming using total focusing reconstruction. For each acquisition, one channel is active for transmit, and all channels are active for receive. Reconstruction and processing are synchronized with respect to acquisition.

1.3 LineMode - Conventional Scanlines with Focused Beams

Sequence programming file using ray lines (focused transmits) and receive acquisitions. For each acquisition, all channels are active for transmit and receive.

1.4 WideBeam - Weakly Focused Overlapping Beams

Sequence programming file for using overlapping wide beams. For each acquisition, all channels are active for transmit and receive.

Table 1: Verasonics Example Scripts NDE_NDT

File name (root) Setup_Probe_Root.m	Description	UTA 160- DH/SH	UTA 160-SI			UTA LEMO
		Custom 5MHz probe	Custom 5MHZ Probe	P 5-64- vN	P5-128- vN	
Flash Angles	Multiple-angle plane wave	☒	☒	☒	☒	
FMC	Full Matrix Capture	☒	☒	☒	☒	☒
Line Mode	Scan lines with focused beams	☒	☒	☒	☒	
Wide Beam	Weakly focused overlapping beams	☒	☒	☒	☒
